

Audience Research: Empathic People

A research report on 25-34 year old people who have a strong sense of empathy in the United States with no knowledge of Cru.

Objectives: To better understand the background and concerns of the marginalized in the US.

What we'll learn:

- What does Empathic mean?
- Traits of Empathic People
- The Science Behind Storytelling
- Communication Style of Empathic People
- Audience Demographics
 - The audience has been tailored to 25-34 year old people who have a strong sense of empathy in the United States with no knowledge of Cru.

EMPATHIC

1. : involving, characterized by, or based on empathy
2. : the action of understanding, being aware of, being sensitive to, and vicariously experiencing the feelings, thoughts, and experience of another of either the past or present without having the feelings, thoughts, and experience fully communicated in an objectively explicit manner

Look for ways to engage people outside their social circle.

Focus on commonalities with others instead of differences.

Seek experiences that help them empathize with others.

Listen well and speak vulnerably.

Driven to serve others and advocate for justice.

Unconditional love those who are against them.

Giving vs Need

Giving by individuals totaled an estimated \$286.65 billion, rising 5.2 percent in 2017 (an increase of 3.0 percent, adjusted for inflation). However, in 2017, there were 39.7 million people in poverty in 2017 within the United States.

Violence

There were 1.24 million violent crimes reported in 2016 in the United States. Of those murdered in the United States, 52% were Black/African American.

Hate-motivated crimes

Hate crimes in the nation's 10 largest cities increased by 12% in 2017. The most common hate crimes are against African Americans (27%) and people of Jewish faith (19%).

In 2012, Dr. Paul Zak conducted research on the biological influences that create empathy (click the image below to watch a 4 minute video on this study).

What we learned from this study is that ***storytelling releases empathy*** and ***results in action***.
